Your Home

Protect You and Your Loved Ones

## Home Test Kits In Stock For Immediate Shipment

For \$15 and 15 Minutes You Can Have Your Life Back

Now You Can Have BBQ's, Birthday Parties and Weddings  
and Not Have Them Turn into Super Spreader Events

**“Delta is the most infectious virus ever seen” - CDC**

**CDC REPORTS:**

**"Delta Strain as Contagious as Chickenpox"**

**“Fully vaccinated people becoming symptom free Super Spreaders”**

**“Vaccinated people infected and getting sick”**

**You Would be a Fool Not to be Worried**

**The above headlines sent chills up and down my spine. I always knew the Delta strain is a highly contagious killer... but to see it confirmed in black and white is my worst nightmare**

Our vaccines at 6 months old are failing and at best it will be the end of the year before a new vaccine targeted to the Delta variant will be available. You need in the mean time to get a third booster shot of the existing vaccine. If and when you can.

Until then, what do we do about the 1,000 times more infectious Delta mutation that is defeating our vaccines!!!!!! I agonized day and night. Short of living in a clean room, donning a hazmat suit I could not guarantee your safety.

So our solution could not be simpler. And it works in part because the Delta mutation is so infectious. The solution is:

**At home testing...**

Give me \$15 and 15 minutes and I'll give your life back.

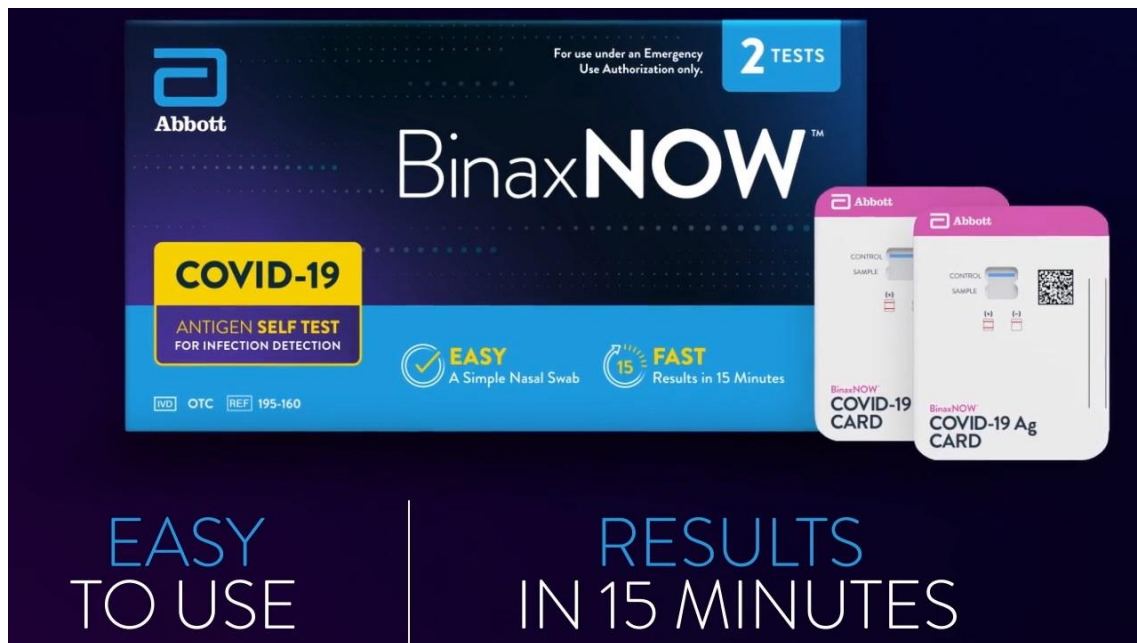

The viral load of this Delta variant is 1,000 times more infectious than the Alpha variant... And it gets into your nose and throat in a matter of hours if you're infected. So the solution is very simple.

Test everyone you're about to let around you. And here is the really good part. You do not need to test everyone in the same household. Suppose your family is coming with the grand kids. If they all live in the same house all you need to do is test one person. Because the variant is so contagious they are either all infected, symptoms or not, or hopefully no one is infected... And these new test kits I have in stock well tell you in fifteen minutes.

We have sold over 1,000 test kits, 100 left in stock for immediate delivery. Order now, same day shipping. I can have them in your hands next week. It's the best home test kit on the market. They are made by Abbott in the USA and have FDA Emergency Use Authorization. We made a special purchase and can offer you the BinaxNOW COVID-19 Test Kit at the best delivered price anywhere. Better hurry, stocks are disappearing. Amazon and Wal-Mart are out of stock. You might find a pharmacy that has them for in-store pickup, one to a customer.

**Order NOW**

### **Announcing the: Abbott BinaxNOW COVID-19 OTC Home Test kit**

### **What you get:**

- Two tests in each box

**To order by phone, call Jim at: 866-924-0607**

**To order online, click the button below**

**Order NOW**

**Please note: We will only accept orders for supplies we have. I expect prices to rise and supplies to run out. You remember what happened with the N-95 masks.**

It's great, we are back to barbecuing and having visitors once again.

The Abbott BinaxNOW COVID-19 OTC Test utilizes trusted technology used for decades by healthcare professionals and makes simple, easy-to-use COVID-19 tests easily accessible. This has been a game changer for us. Life around here is now near normal. The best it's been in two years... Since this horror show started.

**Features/Benefits:**

When it comes to COVID-19, knowledge is power. People want to know if they are infectious or not and they want their results now.

Rapid tests are best at detecting higher amounts of viral load when people are most likely to be infectious. And they deliver results quickly enough to help sick individuals from potentially spreading the virus to others. With multiple rapid tests available, what should you look for when selecting a rapid test?

**Speed:** Look for tests that offer results in minutes, not hours or days. Tests claiming to be "rapid" but still require mail-in samples or lab processing times have delays built in. Our BinaxNOW COVID-19 tests deliver results in 15 minutes or less.

**Convenience:** Testing that's convenient and accessible is likely closer to you. Tests that don't require instrumentation can be performed at home (with a virtually guided service) or outside of traditional healthcare settings, in drive-thru clinics, schools, workplaces and stand-up community testing sites. Look for tests offered in myriad locations.

**Comfort:** Nasal swabs that don't require a deep swab are the most comfortable. They're preferable to nasopharyngeal swabs, which can be uncomfortable and require that healthcare workers take additional precautions.

**Reliability:** Our BinaxNOW test is among the most studied rapid antigen test in the country and demonstrates performance of 95.6% positive agreement (sensitivity) in people seven days or less post-symptom onset with Ct counts of 33 or below. These are people who are most likely to be infectious and spread the virus to others.

**Track Record:** All COVID-19 tests in the U.S. have been authorized under FDA Emergency Use Authorization. Abbott's rapid tests are among the most widely-used in the U.S., with more than 200 million of our BinaxNOW rapid tests used in urgent care clinics, doctor's offices, pharmacies, nursing homes, and schools since April 2020.

### **Our Rapid COVID-19 Tests**

Our BinaxNOW test is the size of a credit card and requires no specialized instrumentation. This sleek form factor is what allows us to make it at scale and sell it at an affordable price. The test can be used at home without a prescription and through a virtually guided online video. This test kit is extremely easy to use.

Even as promising vaccines become more widely available, reliable, quick and convenient rapid testing will play an important role in containing pockets of infectious mutations that are in some cases defeating vaccinations.

Home testing is helping people get back to business, travel, school and visiting loved ones.

Because the sooner your COVID results are known, the sooner you can get back to the things you want to do. And now, you're ready.
